CV OR LINKEDIN SUMMARY

I’m an ICU nurse with six years’ experience in a 16-bed adult intensive care unit in Amman, caring for patients on mechanical ventilation and continuous haemodynamic monitoring.

Over the past three years I’ve trained 18 new nurses, and I designed a one-page ventilator safety checklist that our whole unit now uses at every shift change. I work comfortably in Arabic and English.

I’m now looking for an ICU nursing role in the UK, where I can bring this experience to a team that values careful handovers as much as I do.
