Arabic calligraphy logo

Rasha Kayali

◆ ◆ ◆

Your name deserves better than a typed Arabic font.

Most Arabic logos are made from the same few fonts, so they end up looking alike. I draw your name by hand, in diwani, thuluth or a modern style, and turn it into a clean logo you can print on a cup, a sign or a box.

What you get:

• Three hand-drawn concepts to choose from
• Two rounds of revisions
• Final files in SVG, PNG and PDF, in colour and in black
• Matching Latin lettering, if you need it
• Delivery in 4 days

How it works:

1. You send me your brand name and a few words about your business.
2. I sketch three directions and send them to you.
3. You choose one, we refine it, and I prepare your final files.

To start, send me your name exactly as it should appear, its meaning if it has one, and two or three logos you like, in any language.

I have practised calligraphy for nine years and drawn about 120 logos for cafés, shops and brands in Turkey, Germany and the Gulf.
