Thank you: Data Analyst interview, 3 November

Dear Ms Ben Amor,

Thank you for taking the time to talk with me yesterday about the Data Analyst role. I enjoyed hearing how the team works, and especially your point about the Monday delivery report that is rebuilt by hand every week.

I have been thinking about it since. A scheduled SQL query feeding a simple dashboard could have that report ready before anyone arrives on Monday. Last month I built a small dashboard from public transport data that follows the same pattern: example.com/youssef/transit

I am very interested in the role, and I would be glad to help with that report from my first week.

Best regards,

Youssef Trabelsi
